What is the Arizona Early Childhood Development and Health Board (First Things First)?

In November 2006, Arizona voters passed Proposition 203, also known as **First Things First**, a citizen's initiative that funds quality early childhood development and health at the state and local level. The Proposition created a new state level board known as the Arizona Early Childhood Development and Health (AzECDH) Board, also known as the Board of First Things First, and the Regional Partnership Councils.

First Things First Mission

The mission of First Things First is to increase the quality of, and access to, early childhood programs that will ensure a child entering school arrives healthy and ready to succeed. This mission will principally be achieved through regional grants tailored to the specific needs and characteristics of the communities that the regions serve, with a focus on demonstrating improved outcomes around First Things First's six goal areas prioritized by the challenges the regions face. This mission is also accomplished through statewide initiatives that have been prioritized by the Board of First Things First.

This statewide policy and regional perspective are critical to the success of the First Things First mission. Early childhood development and health system initiatives from First Things First will be coordinated through statewide initiatives and regional priorities.

First Things First Goal Areas

The First Things First initiative specifies that programs undertaken by the Arizona Early Childhood Development and Health Board and the Regional Partnership Councils are to accomplish one or more of the following Goal Areas:

- Improve the quality of early childhood development and health programs.
- Increase the access to quality early childhood development and health programs.
- Increase access to preventive health care and health screenings for children through age five.
- Offer parent and family support and education concerning early childhood development and literacy.
- Provide professional development and training for early childhood development and health providers.
- Increasing coordination of early childhood development and health programs and provide public information about the importance of early childhood development and health.

What is the Funding Source?

The First Things First initiative provides for the distribution of funding through both statewide and regional grants.

Of the monies expended in a fiscal year from the First Things First program account, no more than ten percent may be used to fund statewide grants or programs. Statewide programs are

considered those implemented across regional boundaries and are designed to benefit Arizona's children as a whole.

This Request for Grant Application is specifically dedicated to funding a Statewide program that will work in coordination with the Regional Partnership Council. Regional funding is based on the approval of the Regional Partnership Council funding plans submitted to the Board of First Things First. Funding for programmatic elements in this solicitation is provided from the participating Regional Partnership Councils and the infrastructure is being funded through Statewide program funds allocated by the Board of First Things First.

Who is Eligible to Apply for this Funding Opportunity?

First Things First awards grants to:

- Non-profit 501 (c) (3) organizations providing services in Arizona (both secular and faith-based)
- Units of Arizona government (local, county and state entities as well as schools and school districts)
- Federally recognized Tribal governments or entities providing services within Arizona
- Arizona institutions of higher learning (colleges and universities)
- Private organizations providing services in Arizona

All potential Applicants must demonstrate organizational, fiscal and programmatic capacity to meet the requirements described in the scope of work listed in this RFGA.

What is the Total Funding Amount Available in this Request for Grant Application?

This is a seven (7) month contract with an option for renewal for two (2) additional twelve (12) month periods. Total funds available are approximately \$270,000 for the first funding period. Funding available in year one is to include initial outreach and at least 50 practices. Renewal funding is estimated to be \$390,000 for 12 months with less focused outreach costs and at least 100 practices. In addition to the statewide estimates; there is an expectation that Regional Partnership Councils may build on these statewide numbers with additional funding through approved Funding Plans. First Things First reserves the right not to award the entire amount of available funds or to award an amount that is greater than the posted available funds. Renewal will be contingent upon satisfactory contract performance, evaluation and availability of funds. In order to ensure adequate coverage of First Things First requirements, it is anticipated that a single award will be made. Multiple awards may be considered; however, a single award is expected.

Scope of Work: What Will This Grant Fund?

Physician outreach and education is a quality improvement strategy with the goal of assisting physicians in identifying the health system and practice procedures that need to change or be implemented that would result in consistent quality care for children in a medical home model. Physicians involved in a quality improvement strategy engage in activities that includes assessment of their health care delivery systems and development of a plan for improvement. They receive technical assistance and coaching as well as materials to support clinical practice

improvement. Support may also be provided through the formation of collaborative learning groups that commit to the quality improvement process. Additionally, some regions may wish to procure care coordination services and distribute incentives to encourage and support implementation of recommended medical home model of practices.

This strategy is particularly important to strengthening early identification of developmental delay and timeliness of intervention. Pediatricians and family physicians receive technical assistance related to procedures and best practices to elicit parents' concerns and perceptions through developmental screening using a standardized, validated tool. Additional support and education is provided around the development of systems that track children a physician refers for evaluation. Support is also provided to assist practices in identifying community resources that support child development based on the individual needs of the child and family. The importance of this component of the education and outreach strategy is heightened due to the current economic situation. As services change and the intervention system evolves, physicians will need support in understanding those changes and how to best provide information to families.

A key benefit of the physician outreach and education strategy is that it supports a medical home model of care. Through development of high quality assessment and follow up activities, physicians fully integrate practices that provide strong continuity of care for children and families.

Implementation Requirements:

Physician Outreach and Education implemented under this funding opportunity includes:

- Practice assessment and implementation plans to improve the delivery of preventive service such as immunizations, lead screening, anemia risk screening, tobacco risk exposure, sleep position risk identification, dental screening, vision screening, and screening for developmental delays in accordance with standards of preventive care.
- Practice assessment and implementation planning.
- On site education and coaching on enhanced use of parent assessments, parent education, and establishment of medical homes.
- Onsite technical assistance and coaching on establishing systems to track referrals to appropriate health care specialists or other recommended health and social services in the community.
- Onsite technical assistance and coaching to help establish systems and mechanisms to track referrals and follow-up to appropriate early intervention services including, but not limited to the Arizona Early Intervention Program (AzEIP).
- Information about referral pathways and intervention services when developmental and physical delays are identified.
- Establishment, when feasible, of a physician practice learning collaborative to identify barriers to quality practice and achieve practice-based quality improvement.
- Integration of lessons learned and best practices in physician continuing education programs.

- Collaboration with the Arizona Early Intervention Program (AzEIP), Arizona Department of Education, Arizona Department of Health Services and AHCCCS regarding early screening, referral, and follow-up.
- Advocacy efforts supporting insurance coverage that includes reimbursement for early screening using standardized, validated screening tools.
- In some regions, procurement of care coordination services to support and facilitate access to other health and social services within the community for children and their families.
- In some regions, distribution of incentives to assist with implementation of a medical home model.

If implementing a national model, it is expected that evaluation tools within that model will be utilized in addition to collecting required performance measure data. Expenses for the evaluative staff time should be included in the applicant's budget request. For budgeting purposes, average costs have been estimated at per participant, with a range of per participant. A reasonable estimate to fund a comprehensive physician outreach and education project described above would be \$6,000 per practice and could include items such as printing of educational materials, outreach necessary for program development, and staff expenses. It is expected that this amount will be less in subsequent years of funding.

Applicants should describe the educational background and experience of all staff participating in physician outreach and education. Preference will be given to those who are trained physicians, health practitioners or health administrators, and/or those who have extensive background and experience in physician training or practice improvement processes. This Request for Grant Application is seeking Applicants to address these specific Goals and Key Measures:

First Things First Goal Area to be addressed:

- Health

First Things First Goals to be addressed:

- FTF will coordinate and integrate with existing education and information systems to expand families' access to high quality, diverse and relevant information and resources to support their child's optimal development.

First Things First Key Measures to be addressed:

- Percentage of families with children birth through age five who report they are satisfied with the accessibility of information and resources on child development and health.
- Percentage of families with children birth through age five who report they are competent and confident about their ability to support their child's safety, health, and well-being.

Coordination and collaboration with all FTF grantees is critical to developing a seamless service delivery system for children and families. Services and programs cannot be implemented in isolation and coordination and collaboration must occur with First Things First Regional

Partnership Councils. FTF staff and Regional Councils will identify opportunities for collaboration and coordination with successful Applicants that become grantees of First Things First. As appropriate, the successful Applicant will be required to participate in First Things First meetings and workgroups. The successful Applicant will also be required to share data with First Things First and the Regional Partnership Councils that will be used for cross-regional analysis.

Any evaluation should be directly connected to the Goals, Key Measures, and Performance Measures and should determine the extent to which the program has accomplished the stated goals and key measures. The evaluation should also measure program fidelity by assessing which activities were implemented and the quality, strengths and weaknesses of the implementation. Successful Applicants agree to participate in the First Things First evaluation and will meet the requirements of the evaluation including, but not limited to, timely and regular reporting and cooperation with all First Things First evaluation activities. Timely and regular reporting of all performance and evaluation data includes the electronic submission (through the First Things First secure web portal) of performance measures and other evaluation data as proposed by the Applicant in this Request for Grant Application. Performance measure data must be submitted in its raw form (e.g., number of children served / proposed service number = 52 actual children served / 50 proposed service number).

Successful Applicants are also required to collaborate with the First Things First longitudinal evaluation. The provider must participate in child assessment activities associated with the longitudinal evaluation including tracking and reporting to First Things First data pertaining to participant attendance, enrollment, and demographic information; all of which must be maintained in a secure and anonymous manner. In addition, Applicants agree to allow First Things First and evaluation consultants of First Things First to observe program activities on-site and obtain parent consent for data collection related to evaluation efforts.

Performance Measures are defined by First Things First to determine the key impacts of the strategies, programs and approaches being implemented. Applicants are expected to collect and report data to First Things First on the progress of achieving the Performance Measures. Performance Measures for purposes of this RFGA are as follows:

Performance Measures:

- Total number of physician practices receiving practice improvement support
- Total number of physicians within practices receiving practice improvement support
- Total number of physician practices involved in practice improvement that identify as a medical home.
- Number of physicians participating in practice improvement that consistently utilize a validated, standardized, validated developmental screening tool for developmental screening.
- Number of physicians that complete a practice improvement plan.
- Average number of encounters per practice that are participating in the program.

BUDGET NARRATIVE EXPLANATION

The purpose of the budget narrative is to provide more clarity and detail on the various budget line items. The budget narrative should explain the criteria used to compute the budget figures on the budget form. Please verify that the narrative and budget form correspond and the calculations and totals are accurate.

Personnel: *Include information such as position title(s), name of employee (if known), salary, time to be spent on this program (hours or %), number of months assigned to this program, etc. Explain how the salary rate for each position was determined. If salaries are expected to increase during the project year, indicate the percentage increases for each position and justify the percent of the salary increase. Also, be sure to include the scheduled salary increases on the Budget Form.*

Fringe Benefits: *(Include a benefit percentage and what expenses make up employee benefit costs. Indicate any special rates for part-time employees, if applicable. Explain how the benefits for each position were determined. If using a fringe benefit rate, explain how this percentage is justified or approved by your agency.*

Contracted Consultant/Professional Services: *If professional consultants/services costs are proposed in the budget, define how the costs for these services were determined and the justification for the services related to the project. Explain how all contracts will be procured.*

Travel: *Include a detailed breakdown of hotel, transportation, meal costs, etc. Indicate the location(s) of travel, the justification for travel, how many employees will attend and how the estimates have been determined. Explain the relationship of each cost item to the project (e.g., if training or training expenses are requested, explain the topic of the training and its relationship to the project). Applicants **must** use the State of Arizona Travel Policy on rates for mileage, lodging, and meals (<http://www.gao.az.gov/travel/>)*

Pass Through/Sub grants: *In the event that this application represents collaboration and the contract will be utilizing other sub grantees to perform various components of the program, include a list of sub grantees, programmatic work each sub grantee will perform, and how costs for each sub grantee are determined.*

Supplies and Operating Expenses: *Explain each supply item to be purchased, how the costs were determined and justify the need for the items. Items with a unit cost less than \$5,000 are considered supplies and should be listed in this category. All purchases should be made through competitive bid or using established purchasing procedures.*

Administrative/Indirect Costs: *Administrative costs are general or centralized expenses of overall administration of an organization that receives grant funds and does not include particular program costs. For organizations that have an established federally approved indirect cost rate for Federal awards, indirect costs mean those costs that are included in the organization's indirect cost rate. Such costs are generally identified with the organization's overall operation and are further described in 2 CFR 220, 2 CFR 225, and 2 CFR 230.*

Applicants must list either Option A or Option B and provide proper justification for expenses included:

Option A - Administrative Costs: *with proper justification, sub grantees may include an allocation for administrative costs for up to 10% of the total direct funds requested of the grant request. Administrative costs may include allocable direct charges for: costs of financial, accounting, auditing, contracting or general legal services; costs of internal evaluation, including overall organization's management improvement costs; and costs of general liability insurance that protects the organization(s) responsible for operating a project, other than insurance costs solely attributable to the project. Administrative costs may also include that portion of salaries and benefits of the project's director and other administrative staff not attributable to the time spent in support of a specific project.*

Option B - Federally Approved Indirect Costs: *If your organization has a federally approved indirect cost rate agreement in place, grantees may include an allocation for indirect costs for up to 10% of the grant request. **Applicants must provide a copy of their federally approved indirect cost rate agreement.***

Indirect costs are costs of an organization that are not readily assignable to a particular project, but are necessary to the operation of the organization and the performance of the project. The cost of operating and maintaining facilities, depreciation, and administrative salaries are examples of the types of costs that are usually treated as indirect.
